Invoice App Currency Update Summary

Changes Made

Currency Symbol Updated:

- **From**: £ (British Pounds)
- **To**: $ (US Dollars)

Pricing Display:

- **Monthly Plan**: $8.99/month
- **Yearly Plan**: $99.00/year
- **Savings**: 8% discount with yearly billing

Files Updated

1. Frontend Registration Component

File: `Invoice-App/frontend/src/components/RegisterPage.jsx`
- Updated monthly plan price display: `'£8.99'` → `'$8.99'`
- Updated yearly plan price display: `'£99'` → `'$99'`

2. Email Service Utilities

File: `Invoice-App/frontend/src/utils/emailService.js`
- Updated all currency symbols in invoice formatting
- Changed subtotal, tax, and total displays from £ to $
- Updated item price displays in HTML and text formats

3. EmailJS Service

File: `Invoice-App/frontend/src/utils/emailjs-service.js`
- Updated currency code: `'GBP'` → `'USD'`
- Changed all financial displays from £ to $
- Updated invoice email templates with $ symbols

4. Test Files

File: `Invoice-App/frontend/__tests__/invoiceForm.test.jsx`
- Updated test expectations to check for $ symbols instead of £
- Modified regex patterns to match new currency format

Deployment Status

Production URL: https://iqslz4s4ko38.space.minimax.io

✅ **Frontend deployed with updated currency symbols**
✅ **All invoice displays now use $ (USD)**
✅ **Registration pricing shows correct $ symbols**

Application Consistency

Now Uses $ Throughout:

- Subscription pricing display

- Invoice generation

- Email templates (HTML and text)

- Payment summaries

- Test expectations

Currency Code:

- Changed from GBP (British Pounds) to USD (US Dollars)
- Maintains all existing pricing values with new currency symbol

---

Status: ✅ **COMPLETE** - Currency successfully updated from £ to $ across entire application
